

Amendments to the list of goods codes in the international trade in goods statistics starting with reporting month January 2024

The list of goods codes changes yearly.

Amendments to the combined nomenclature (CN) - and therefore the list of goods codes (CN-code) - are based on the Regulation of the European Commission:

[List of goods codes 2024 - Official Journal: combined nomenclature; valid from 1.1.2024 \(PDF\)](#)

It is necessary to amend the list of goods codes yearly in order to take account of changes in requirements relating to statistics, to trade policy as well as technological and commercial developments. These changes have been taken into account by the European Commission while implementing the new Regulation.

These amendments lead to yearly introductions of new goods codes as well as to deletions or revisions of currently valid goods codes.

In the Regulation itself new goods codes are marked with a star (★); amendments (with significant content change) in the description of goods codes are marked with a square (■), which means that these goods codes remain unchanged while their description have been modified.

There also might be changes with regard to supplementary units.

The Regulation enters into force on 01 January 2024 and is valid for the whole reporting year 2024.

The allocation of goods to an individual goods code must always be made according to their specific nature.

Deletions or introductions of goods codes could also indicate changes of their respective subheadings (CN2-, CN4- and CN6-codes).

The following tables (no.1-6) are just indicative - they serve as an aid for the allocation of goods to goods codes.

1. Comparison: goods codes 2023 to goods codes 2024 (transposition list)
2. Amendments: supplementary unit; *valid* from 1.1.2024
3. Amendments: goods codes remain unchanged while the description has been modified as of 1.1.2024 (reused)
4. Deletion: goods codes which are *invalid* from 1.1.2024
5. Introduction: new goods codes which are *valid* from 1.1.2024
6. Comparison: goods codes 2023 to goods codes 2024 (transposition list) with description

Please don't forget to implement all relevant amendments on time.

The latest date for submitting the reporting month January 2024 is 14 February 2024.

The current reporting deadlines (Einsendetermine) and questions regarding the allocation of goods to goods codes (Warennummernauskunft) can be found in the INTRASTAT-Guidelines:

[INTRASTAT-Guidelines](#)

Further service documents are available on our website (partly available in English):

[Foreign trade \(INTRASTAT\) - STATISTICS AUSTRIA - The Information Manager](#)

Overall remarks on the tables

Column A contains the goods codes from the previous year. These are either reused (table 3) or cancelled goods codes (table 4). Column C contains the goods codes from the current year, which are either reused (table 3) or new goods codes (table 5).

The addition "ex" in column B means that a goods code in the current year comes partly from the goods code of the previous year. At least one additional goods code of the previous year is included in the conversion.

New goods codes are marked with an asterisk (★) in column D (or E in table 6). Reused goods codes, in which the content of the goods code changed significantly, are marked with a square (■). In the case of a goods code, in which the content of the goods code changed only slightly, the field in column D (or E in table 6) remains empty (). Content change means that the assignment of products/articles to a currently valid goods code has changed compared to the previous year. Pure text changes to a goods code, i.e. only the descriptive text of the goods code changed, are not listed in this document.

The column "Supplementary unit" always refers to the goods codes of the current year.

Some new goods codes (table 5) cannot be assigned to goods codes from the previous year in the comparison tables and are therefore not listed.

With the annual amendments of goods codes, several situations can arise, which are shown below as examples with fictitious goods codes.

1 to 1 correspondence

A single goods code from the previous year is replaced by exactly one new (★) goods code in the current year.

Goods code previous year		Goods code current year		Supplementary unit
8888 00 01	-	8888 00 02	★	-

The goods code 8888 00 01 from the previous year is replaced by the new goods code 8888 00 02 (★) in the current year.

1 to m correspondence

A single goods code from the previous year merges into several goods codes in the current year. The assignment can be made to reused (■) () and/or new (★) goods codes.

Assignment to new (★) and reused (■) () goods codes

Goods code previous year		Goods code current year		Supplementary unit
9000 00 01	-	9000 00 01	■	-
	-	9000 00 02	★	-

If the change of the content of the goods code 9000 00 01 wouldn't be significant, the field in column D would be unmarked ():

Goods code previous year		Goods code current year		Supplementary unit
9000 00 01	-	9000 00 01		-
	-	9000 00 02	★	-

Assignment to new (★) goods codes

Goods code previous year		Goods code current year		Supplementary unit
9000 00 01	-	9000 00 02	★	-
	-	9000 00 03	★	-

The goods code 9000 00 01 from the previous year is no longer valid in the current year and merges into the new goods codes 9000 00 02 (★) and 9000 00 03 (★) in the current year.

n to 1 correspondence

Several goods codes from the previous year are replaced by exactly one new (★) goods code in the current year.

Goods code previous year		Goods code current year		Supplementary unit
8888 00 02	ex	8888 00 01	★	-
8888 00 03	ex	8888 00 01	★	-

For the new goods code 8800 00 01 (★), the goods codes of the previous year 8888 00 02 and 8800 00 03 are used for the conversion.

n to m correspondence

Multiple goods codes from the previous year merge into multiple goods codes in the current year. The assignment can be made to reused (■) () and/or to new (★) goods codes.

Goods code previous year		Goods code current year		Supplementary unit
9200 00 01	ex	9200 00 03	★	-
	ex	9200 00 04	★	-
9200 00 02	-	9200 00 02	■	-
	ex	9200 00 03	★	-
	ex	9200 00 04	★	-

For the new goods codes 9200 00 03 (★) and 9200 00 04 (★), the goods codes of the previous year 9000 00 01 and 9200 00 02 are used for the conversion. The goods codes 9200 00 02 (■) from the previous year also remains valid in the current year, but the content of this goods code has changed and has partly been transferred to the new goods codes 9200 00 03 (★) and 9200 00 04 (★).

In the RTIC reporting tool, the "Blaue KN" is a technical aid that is intended to help you with the annual amendments of goods codes when submitting the Intrastat declaration. A detailed description of the "Blue KN" can be found in the RTIC Help.
